

Manual Welding

Manual Welding Probe 6-014-01

The probe with its new ergonomic form has a good grip and stands for a high performance.

Characteristic Features

Spring-loaded manual spot welder with automatic welding activation, pressure-sensitive

Exchangeable electrodes

Adjustable welding pressure
1.5 – 50 N

Activation by means of micro switch

For cables 16 / 35 / 50 mm

Welding energy up to 128 (256) Ws

Handy and economical

Easy-to-handle and easy adjustable

Length of cable 1.2 m

With earthing probe or clamp

Special designs available

- ❶ Exchangeable electrode
- ❷ Fixing nut
- ❸ Electrode arm
- ❹ Adjusting screw for welding pressure
- ❺ Housing with micro switch
- ❻ Welding cable with actuating cable
